

SVKM's  
D. J. Sanghvi College of Engineering

Program: B.Tech in Mechanical  
Engineering

Academic Year: 2022

Duration: 3 hours

Date: 11.01.2023

Time: 10:30 am to 01:30 pm

Subject: Production Planning and Control (Semester VII)

Marks: 75

**Instructions:** Candidates should read carefully the instructions printed on the question paper and on the cover page of the Answer Book, which is provided for their use.

- (1) This question paper contains three pages.
- (2) All Questions are Compulsory.
- (3) All questions carry equal marks.
- (4) Answer to each new question is to be started on a fresh page.
- (5) Figures in the brackets on the right indicate full marks.
- (6) Assume suitable data wherever required, but justify it.
- (7) Draw the neat labelled diagrams, wherever necessary.

Question No.		Max. Marks																											
Q1 (a)	What are the factors influencing the production planning and control? <b>OR</b> Explain with examples various types of Production Systems.	[10]																											
Q1 (b)	List and elaborate the Prerequisites of PPC.	[05]																											
Q2	<p>Forecasts of the expected demand of a product for the next six months and the production days available during these months of planning horizon are given. Also, the costs associated with various production factors are shown. Find the production costs under the following strategies. (a) Constant workforce level and carrying the inventory (b) Subcontracting as a strategy to meet the fluctuating demand (c) Overtime as a strategy to meet the fluctuating demand (d) Hiring and firing as a strategy to meet the fluctuating demand. Compare and suggest the optimal strategy.</p> <table><tr><th colspan="3">Product demand &amp; available production days</th></tr><tr><th>Month</th><th>Expected demands</th><th>Production days</th></tr><tr><td>Jan</td><td>1000</td><td>20</td></tr><tr><td>Feb</td><td>800</td><td>13</td></tr><tr><td>Mar</td><td>900</td><td>19</td></tr><tr><td>Apr</td><td>1200</td><td>23</td></tr><tr><td>May</td><td>1000</td><td>20</td></tr><tr><td>June</td><td>1400</td><td>18</td></tr><tr><td></td><td>7300 6300</td><td>113</td></tr></table>	Product demand & available production days			Month	Expected demands	Production days	Jan	1000	20	Feb	800	13	Mar	900	19	Apr	1200	23	May	1000	20	June	1400	18		7300 6300	113	[15]
Product demand & available production days																													
Month	Expected demands	Production days																											
Jan	1000	20																											
Feb	800	13																											
Mar	900	19																											
Apr	1200	23																											
May	1000	20																											
June	1400	18																											
	7300 6300	113																											

Various costs involved in production	
Inventory carrying cost	Rs 5 per unit per month
Subcontracting cost per unit	Rs 8 per unit
Average pay rate	Rs 5 per hour (Rs 40 per day)
Overtime pay rate	Rs 10 per hour (above 8 hours per day)
Labour hours to produce a unit	2 hours per unit
Cost of increasing daily production rate (hiring & training)	Rs 300 per unit
Cost of decreasing daily production rate (layoffs)	Rs 500 per unit

Q3 (a)

Compute the sequence that minimises the total elapsed time (in hours) required to complete the following jobs on three machines M1, M2 and M3 in the order M1, M2, M3.

[10]

Machines	Jobs				
	A	B	C	D	E
M1	5	7	6	9	5
M2	2	1	4	5	3
M3	3	7	5	6	7

OR

A particular item has a demand of 9,000 units per year. The cost of one procurement is Rs. 100/- and the holding cost per unit is Rs. 2.40 per year. The replacement is instantaneous and no shortages are allowed. Determine: (a) Economic lot size, (b) The number of orders per year, (c) The time between orders, and (d) the total cost per year if the cost of one units is Re.1/-.

Q3 (b)

What is the purpose of keeping safety stocks?

[05]

Q4 (a)

Calculate the minimum time taken for the two jobs on four machines given below.

[05]

JOB 1	ORDER	A	B	C	D
	TIME	2	3	3	4
JOB 2	ORDER	D	B	A	C
	TIME	2	3	3	4

Q4 (b)	<p>With the help of the activities given, draw a network. Determine its critical path, earliest start time, earliest finish time, latest start time, latest finish time, total float, free float and independent float.</p> <table><tr><th>Activity</th><th>Duration (days)</th></tr><tr><td>1-2</td><td>4</td></tr><tr><td>1-3</td><td>12</td></tr><tr><td>1-4</td><td>10</td></tr><tr><td>2-4</td><td>8</td></tr><tr><td>2-5</td><td>6</td></tr><tr><td>3-6</td><td>8</td></tr><tr><td>4-6</td><td>10</td></tr><tr><td>5-7</td><td>10</td></tr><tr><td>6-7</td><td>0</td></tr><tr><td>6-8</td><td>8</td></tr><tr><td>7-8</td><td>10</td></tr><tr><td>8-9</td><td>6</td></tr></table> <p style="text-align: center;"><b>OR</b></p> <p>Find optimal order quantity for a product for which prices discounts are as:</p> <table><tr><th>Order quantity</th><th>Unit price (Rs.)</th></tr><tr><td><math>0 &lt; Q &lt; 500</math></td><td>10.00</td></tr><tr><td><math>500 \leq Q &lt; 750</math></td><td>9.25</td></tr><tr><td><math>750 \leq Q</math></td><td>8.75</td></tr></table> <p>Monthly demand for product is 200 units, storage cost is 2% of unit cost and cost of ordering is Rs. 100.</p>	Activity	Duration (days)	1-2	4	1-3	12	1-4	10	2-4	8	2-5	6	3-6	8	4-6	10	5-7	10	6-7	0	6-8	8	7-8	10	8-9	6	Order quantity	Unit price (Rs.)	$0 < Q < 500$	10.00	$500 \leq Q < 750$	9.25	$750 \leq Q$	8.75	[10]
Activity	Duration (days)																																			
1-2	4																																			
1-3	12																																			
1-4	10																																			
2-4	8																																			
2-5	6																																			
3-6	8																																			
4-6	10																																			
5-7	10																																			
6-7	0																																			
6-8	8																																			
7-8	10																																			
8-9	6																																			
Order quantity	Unit price (Rs.)																																			
$0 < Q < 500$	10.00																																			
$500 \leq Q < 750$	9.25																																			
$750 \leq Q$	8.75																																			
Q5 (a)	Write short note on PERT.	[05]																																		
Q5 (b)	Write a short note on Enterprise Resource Planning (ERP). List the challenges and benefits of ERP.	[10]
