

SVKM's
D. J. Sanghvi College of Engineering

Program: B.Tech in Mechanical Engineering

Academic Year: 2022

Duration: 3 hours

Date: 12.01.2023

Time: 10:30 am to 01:30 pm

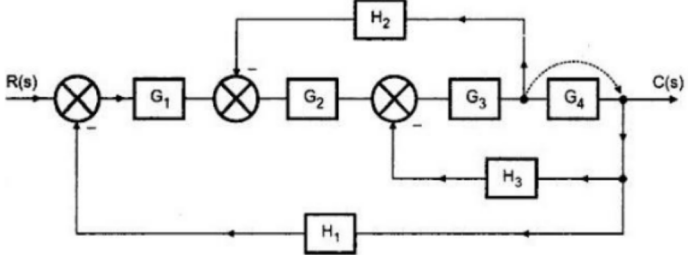

Subject: Industrial Electronics and Controls (Semester V)

Marks: 75

Instructions: Candidates should read carefully the instructions printed on the question paper and on the cover page of the Answer Book, which is provided for their use.

- (1) This question paper contains two pages.**
- (2) Answer to each new question is to be started on a fresh page.**
- (3) Figures in the brackets on the right indicate full marks.**
- (4) Assume suitable data wherever required, but justify it.**

Draw the neat labelled diagrams, wherever necessary

| Question No. | | Max. Marks |
|--------------|---|------------------|
| Q1 (a) | Circuit diagram and view forms explain 180-degree mode of conduction for a 3-phase bridge inverter circuit OR Explain V-I characteristics for SCR with three modes of operation. Define latching and holding current | [10] [10] |
| Q1 (b) | Explain methods to turn on SCR | [05] |
| Q2 (a) | How speed of AC motor can be controlled by inverter circuit. Explain with suitable block diagram OR Describe the working principle of the BLDC motor with a neat, labelled Diagram | [10] [10] |
| Q2 (b) | Write a note on the working principle of the Servo Motor with a neat diagram OR Derive torque equation for Dc motor | [05] [05] |
| Q3 (a) | Obtain Transfer function $C(S)/R(S)$ using block reduction Technique  | [10] |

| | | |
|--------|--|-------------------------|
| | <p style="text-align: center;">OR</p> <p>Derive Expressions for Errors for all 3 different types of systems if applied with 3 different types of Inputs</p> | [10] |
| Q3 (b) | <p>The system is given as under</p> $G(S)H(S) = K / s^2(s+2)(s+3)$ <ol style="list-style-type: none"> Find the Type of the system Error while the input is $1+20t^2$ <p style="text-align: center;">OR</p> <p>Write shortnote on PID</p> | <p>[05]</p> <p>[05]</p> |
| Q4 (a) | <p>By drawing Root locus kindly comment on stability for the system given under: $G(s) = k / s(s+1)(s+3)(s+2)$</p> <p style="text-align: center;">OR</p> <p>Examine the stability by Rouths criteria</p> $S^4+10s^3+35s^2+50s+24=0$ | <p>[10]</p> <p>[10]</p> |
| Q4 (b) | <p>Derive an expression for T.F. for simple closed loop system</p> <p style="text-align: center;">OR</p> <p>Distinguish between open loop and closed loop system.</p> | <p>[05]</p> <p>[05]</p> |
| Q5 (a) | <p>Discuss the role played by following four elements in a PLC:</p> <ol style="list-style-type: none"> Input module Memory CPU Power supply <p style="text-align: center;">OR</p> <p>Write a short note on SCR an its application</p> | <p>[10]</p> <p>[10]</p> |
| Q5 (b) | <p>Write a short note on Logic gates along with their applications.</p> <p style="text-align: center;">OR</p> <p>Write a short note on PLC.</p> | <p>[05]</p> <p>[05]</p> |
